Introduction

The *NCUA Quarterly U.S. Map Review* for the third quarter of 2018 covers several key indicators of the financial health and viability of federally insured credit unions, including:¹

- Median four-quarter growth in assets,
- Median four-quarter growth in shares and deposits,
- Median four-quarter growth in members,
- Median four-quarter growth in loans,
- Median delinquent loans as a share of total loans,
- Median loans outstanding as a share of total shares and deposits,
- Median year-to-date return on average assets, and
- Share of federally insured credit unions with positive year-to-date net income.

Four-quarter growth is the growth from the end of the third quarter of 2017 through the third quarter of 2018. Most maps shown in this review display medians, or the 50th percentile of the distribution of the variable. In other words, for a given metric, half of all credit unions had a value at or above the median, while the other half had a value that was less than or equal to the median.²

Data presented in this review are rounded. Unless otherwise noted, indicators in percentages are rounded to the nearest tenth of a percentage point, while indicators in basis points are rounded to the nearest basis point. In the legends, the data range in each color band excludes the value of the lower bound but includes the value of the upper bound of the range. Credit unions are included in their states of chartering or the states in which their headquarters are located.

NCUA makes information about the financial performance of federally insured credit unions available through its online [Research a Credit Union tool](#). Through this link, you can locate information contained in an individual credit union's Call Report as well as obtain a Financial Performance Report and summary documents about a credit union's performance.

For comments or suggestions about the *NCUA Quarterly U.S. Map Review*, please send an email to ocemail@ncua.gov.

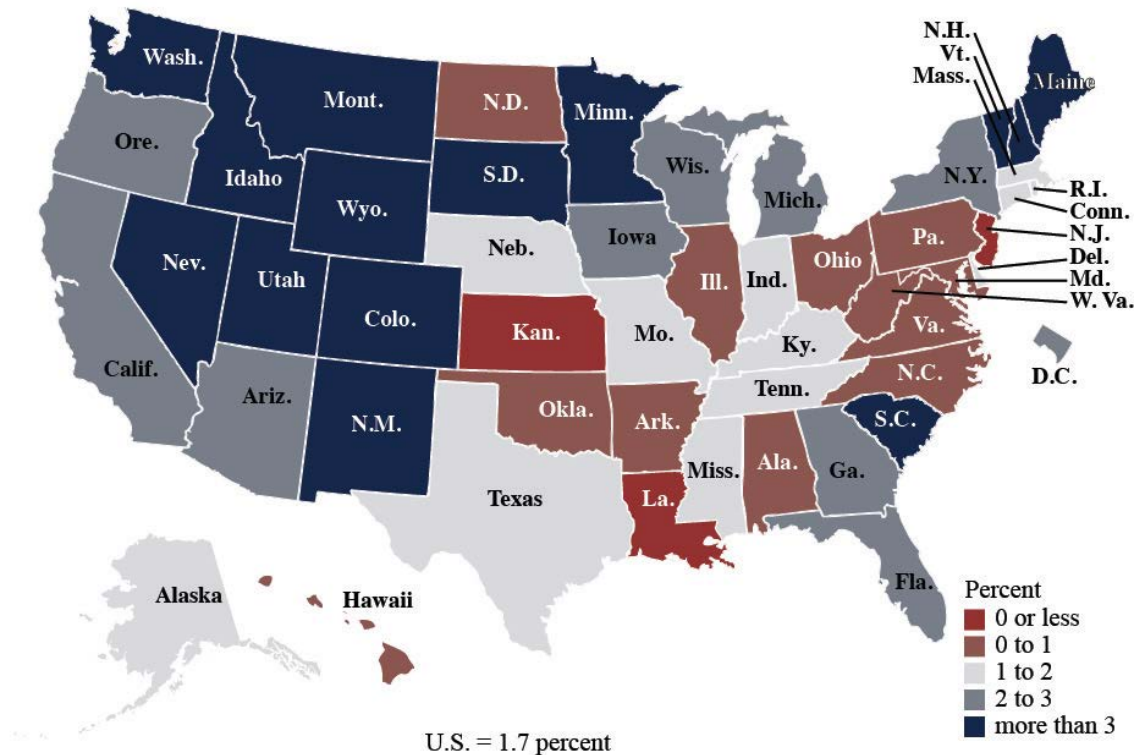

¹ Overseas territories—Guam, Puerto Rico and the Virgin Islands—are included in the summary indicators tables but are not represented on the maps or in the text. The report treats the District of Columbia as a state for comparison and discussion purposes.

² Technically, by construction of the median, there can be several credit unions “tied” at the median value.

Median Annual Asset Growth

Median Annual Asset Growth

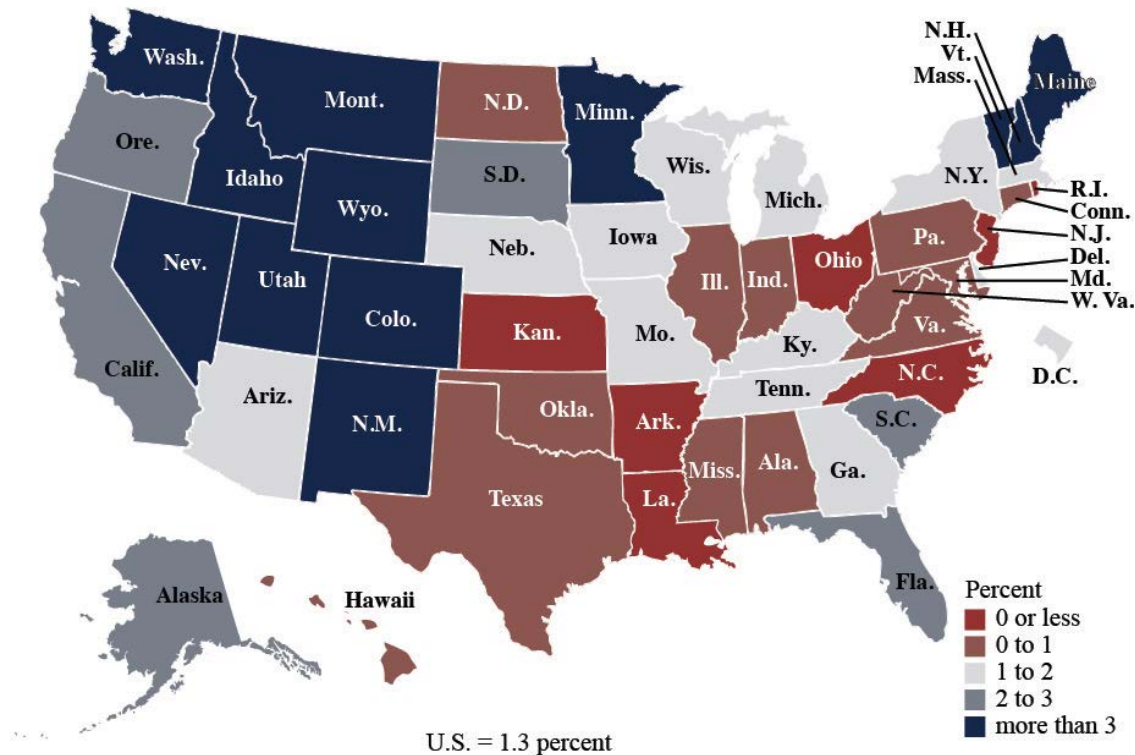

Highlights

- Nationally, median asset growth over the year ending in the third quarter of 2018 was 1.7 percent. In other words, half of all federally insured credit unions had asset growth at or above 1.7 percent and half had asset growth of 1.7 percent or less. In the year ending in the third quarter of 2017, the median growth rate in assets was 2.9 percent.
- Over the year ending in the third quarter of 2018, median asset growth was highest in Utah (5.6 percent), followed by Maine (5.0 percent).
- Median asset growth was negative in New Jersey (-1.2 percent), Louisiana (-0.6 percent), and Kansas (-0.4 percent) over the year ending in the third quarter of 2018. At the median, assets grew the least in Arkansas (0.2 percent) and North Carolina (0.3 percent).

Median Annual Share and Deposit Growth

Median Annual Share and Deposit Growth

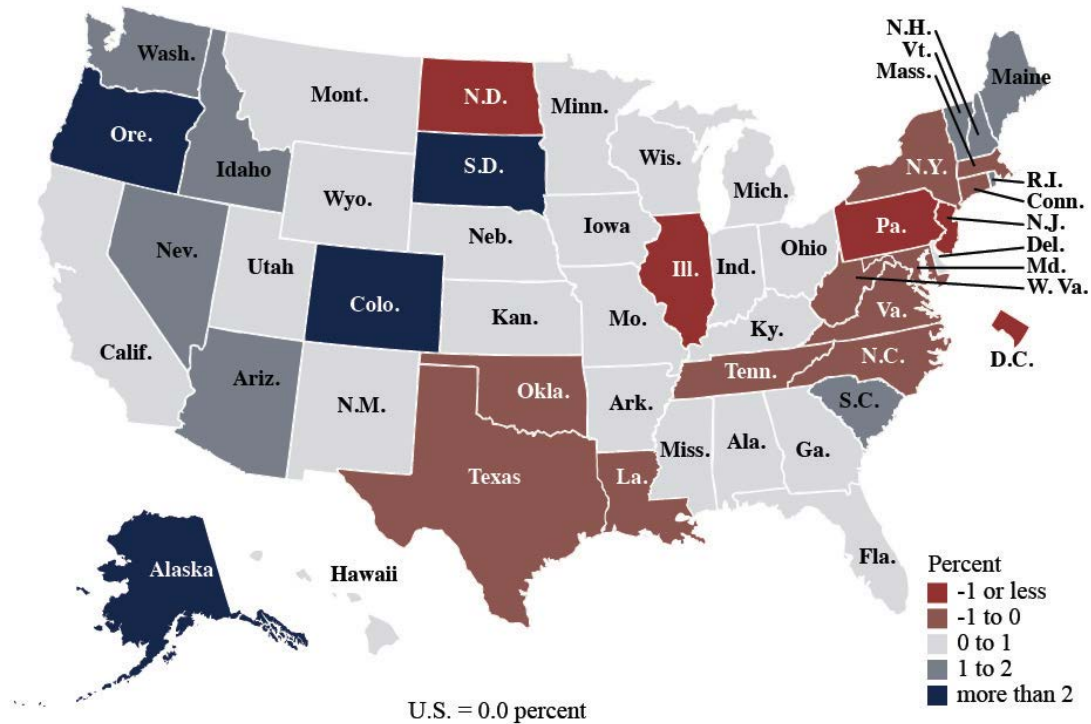

Highlights

- Nationally, median growth in shares and deposits over the year ending in the third quarter of 2018 was 1.3 percent. In the year ending in the third quarter of 2017, the median growth rate in shares and deposits was 2.8 percent.
- Over the year ending in the third quarter of 2018, median growth in shares and deposits was highest in Idaho (6.3 percent) and Utah (6.0 percent).
- Median growth in shares and deposits was negative in six states over the year ending in the third quarter of 2018, led by New Jersey (-1.3 percent) and Kansas (-0.6 percent). At the median, shares and deposits were unchanged in Rhode Island and grew the least in North Dakota and Mississippi (both 0.1 percent).

Median Annual Membership Growth

Median Annual Membership Growth

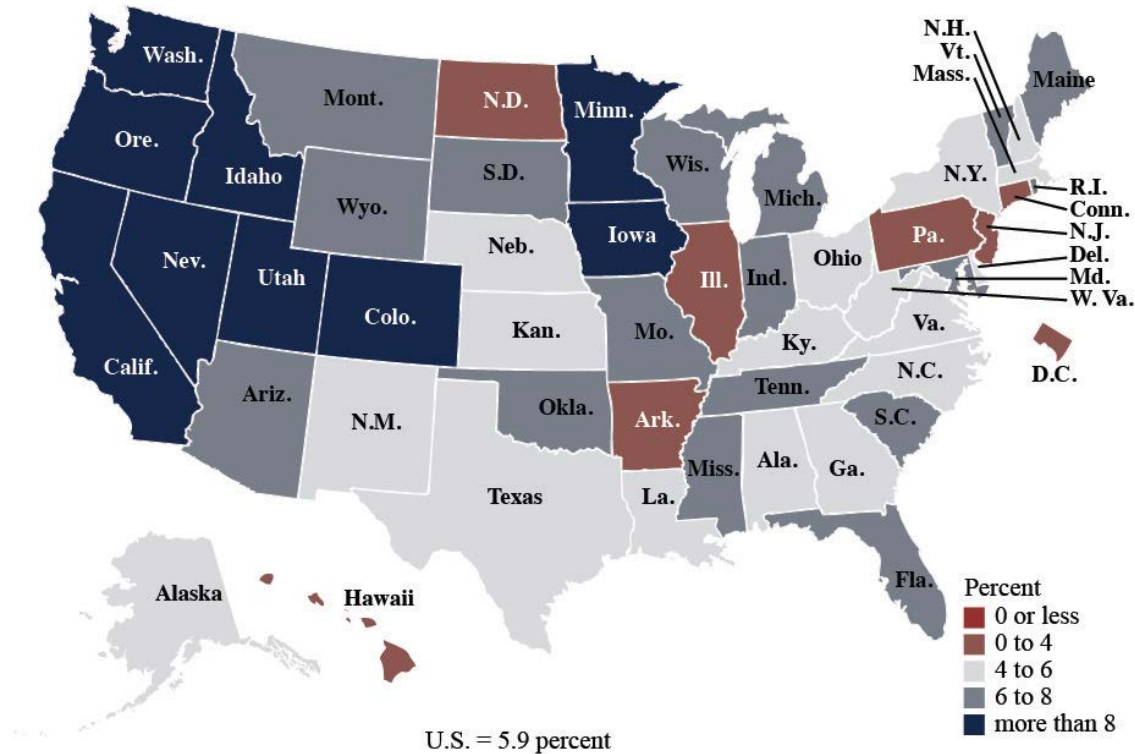

Highlights

- While overall membership in federally insured credit unions continued to grow during the year ending in the third quarter of 2018, at the median, membership was roughly unchanged. Membership was also unchanged at the median over the year ending in the third quarter of 2017. Overall, almost half of federally insured credit unions had fewer members at the end of the third quarter of 2018 than a year earlier. Credit unions with falling membership tend to be small; about 75 percent had less than \$50 million in assets.
- Over the year ending in the third quarter of 2018, credit unions headquartered in Alaska (3.8 percent) and Oregon (3.0 percent) posted the highest median membership growth rates.
- In 13 states, the median membership growth rate for federally insured credit unions was negative. At the median, membership declined the most in the District of Columbia (-1.6 percent), followed by Illinois (-1.5 percent). At the median, membership was unchanged in New York, Tennessee, and Virginia.

Median Annual Loan Growth

Median Annual Loan Growth

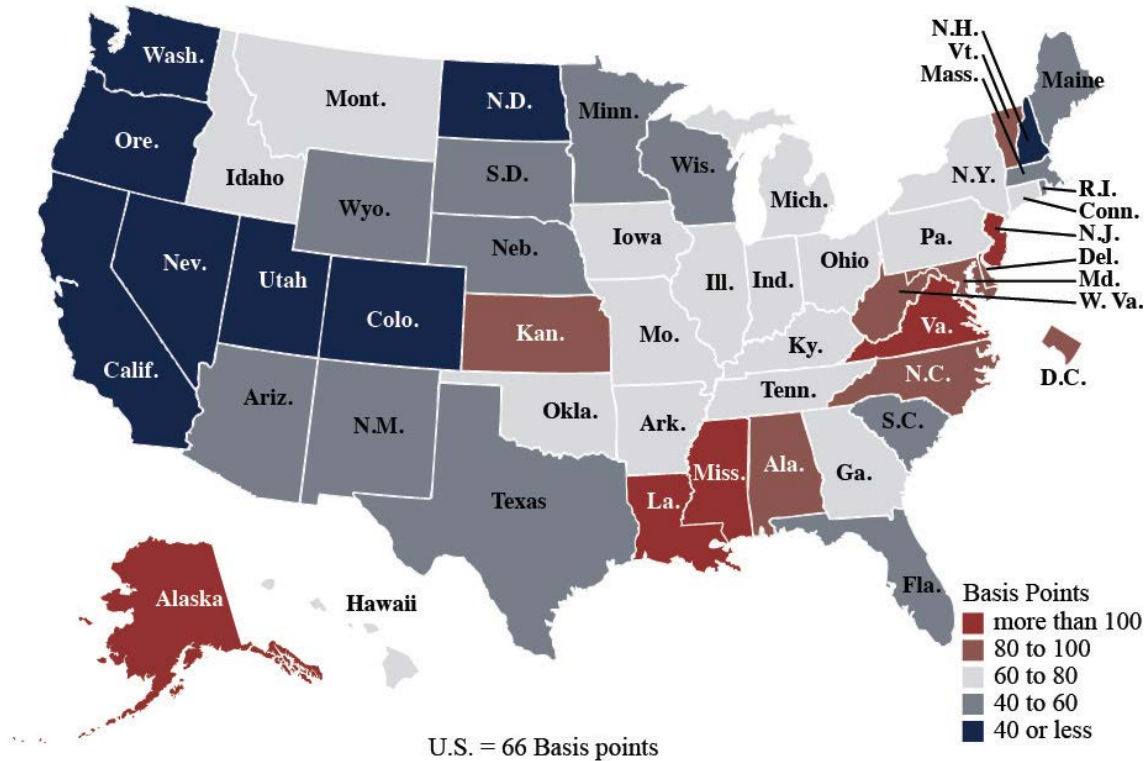

Highlights

- Nationally, the median growth rate in loans outstanding was 5.9 percent over the year ending in the third quarter of 2018. The median loan growth rate during the previous year was 5.0 percent.
- Over the year ending in the third quarter of 2018, median loan growth was positive in every state. Median loan growth was strongest in Minnesota (9.6 percent), followed by Washington (9.4 percent).
- The slowest median growth rate in loans outstanding was in New Jersey (1.1 percent) followed by Connecticut (2.7 percent).

Median Total Delinquency Rate

Median Total Delinquency Rate

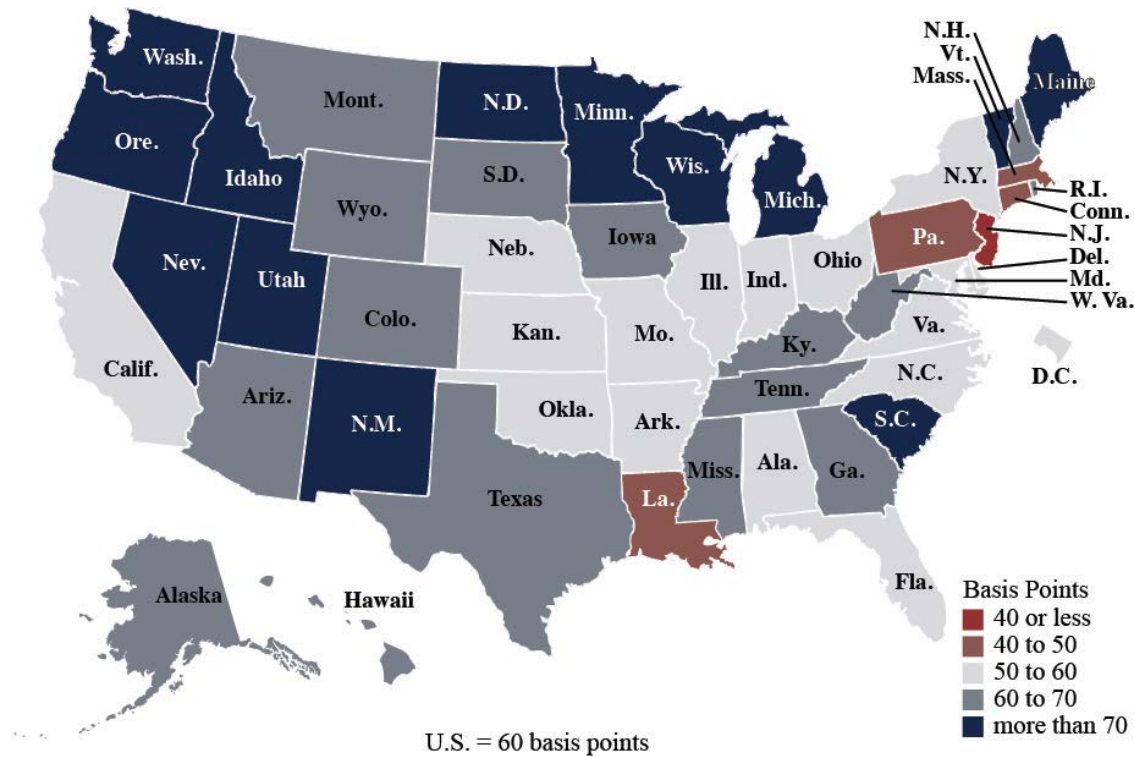

Highlights

- At the end of the third quarter of 2018, the median total delinquency rate among federally insured credit unions was 66 basis points, compared to 72 basis points in the third quarter of 2017.
- At the end of the third quarter of 2018, the median delinquency rate was highest in New Jersey (144 basis points), followed by Mississippi (118 basis points).
- The median delinquency rate was lowest in Oregon (30 basis points), followed by North Dakota and New Hampshire (both 31 basis points).

Median Return on Average Assets

Median Return on Average Assets

Highlights

- Nationally, the median annualized return on average assets at federally insured credit unions was 60 basis points during the first three quarters of 2018, compared to 39 basis points during the same period of 2017.
- Nevada (110 basis points) had the highest median return on average assets during the first three quarters of 2018, followed by Oregon (93 basis points).
- New Jersey (37 basis points) had the lowest median return on average assets, followed by Massachusetts (41 basis points).
